About me

Result-oriented, structured working, customer oriented, hands-on senior executive with more than 30 years of experience in the field of electrical utilities. A proven track-record in turn-around and management of programs and in profit-oriented management of several types of multicultural organizations.

Professional experience and achievements

11/2016 – today

Landos AG: Founder and Managing Director

Establishment of a management consulting company with especially helping clients in reducing their project implementation risk (with concentration on electrical grids), ad-interim management, and projects related to accelerating the energy transition (decarbonisation, digitalisation, decentralisation).

30+ years of experience in power system management, regulatory management, and asset management.

Development activities in large scale PV (Portugal, together with 4 partners (www.solarsynergygroup.eu) → stopped in January 2019) and in mobility transition towards decarbonized mobility solutions (www.mobilität2050.ch), started in March 2019.
